

## MAD PROFESSOR RUBY RED BOOSTER

is a combination of two boosters, master volume and a switchable buffer. You can use the pedal as a treble booster, a clean boost or an overdrive unit or any combination of the above.

Treble boost is great when you want to be heard through the mix or when you are playing with dark humbuckers. The booster circuit is designed to overdrive the amplifiers inputs from nice shimmer to heavy overdrive.

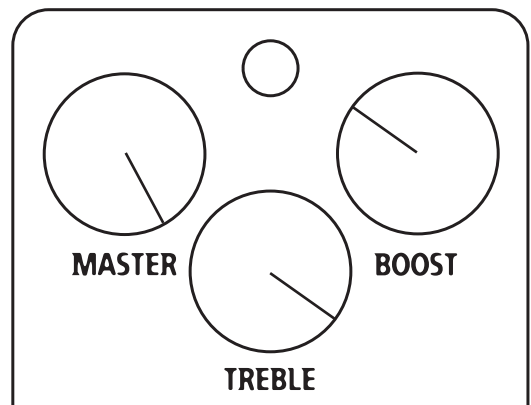

Master volume is really handy and let's you use the pedal as a clean boost or an overdrive.

On/off -switch for buffer you can find inside. And of course, Ruby Red Booster is small footprint like all Mad Professor -pedals.

### A COUPLE OF SETTINGS FOR YOU TO TRY OUT:

**Treble boost with a little bit of dirt.  
Great for dark amps and humbuckers:**

- Master: on full
- Treble: four o'clock
- Boost: ten o'clock

### Mild and shimmery overdrive:

- Master: one o'clock
- Treble: ten o'clock
- Boost: two o'clock
